

The Newest Members of your Maintenance Team

Working 24/7 for 30 days. No hassles. No headaches. No worries.

Introducing TimeMist's Virtual Janitor, EZ Flush and Advanced In-Line System — the systematic approach to facility hygiene management. These easy-to-use solutions work extra hard for you, keeping washrooms fresh and clean all year long...without the overtime expenses.

Each device is proven to reduce the build-up of odor causing bacteria. The EZ Flush hands-free system works automatically, reducing the transmission of germs. The Advanced In-Line and Virtual Janitor systems continuously deliver enzymes, bacteria digesters and surfactants right to the source... removing odors and eating away at scale and stains, while softening water and maintaining healthy drains.

Learn how simple it is to take care of your dirty problems.
